Trans. of Akademiya Nauk SSSR. O[tedeleniye] T[ekhnicheskikh] N[auk]. Izvestiya: Energetika i Avtomatika, 1959, no. 5, p. 156-161.

The problem is considered of computing the transient response of the telegraph equation. For the special case without losses a simple representatio: was obtained that readily permits calculation of the "output" at any station at any preselected time. In the general case the exact result is given in terms of the sum of Bessel functions. For engineering purposes this sum is approximated by a simpler expression which yields satisfactory results.
